Subject: multiphthalate document -- mostly ready for division review
Attachments: Epidemiology Phthalates_SRC_05-25-17.docx

Hi Kris,

I wanted to let you know that the multiphthalate epid document is just about ready for division review. Beth has done a terrific job assembling the front matter and the hazards for which she was responsible. The only sections that need to be inserted are liver and kidney. Audrey is working on those (some serious Word glitches delayed completion) and it should be possible to turn those remaining sections around relatively quickly (however Audrey is out of the office until June 5, so I would not expect those sections to be available until ~June 9).

So, a few questions for you:

Ex. 5 Deliberative Process (DP)

Sorry for all the questions, but I wasn't sure if we'd have an IRIS mgt meeting next week since Monday is a holiday.

Happy Memorial Day weekend! And congratulations to Beth, Audrey, and Glinda Cooper (going a ways back) for getting this draft to this point.

Sue
